NUST Placement Office | Islamabad

Acted as a point of contact for the graduating batch of 2023, collected data for the QS ranking, and helped with the management of events like NUST Alumni Homecoming 2023 and NUST Career Connect 2023.

Projects

Presence+ - An Enhanced Bluetooth-Based Attendance System

Final Year Project

This project introduces a contactless attendance system that leverages Bluetooth Low Energy (BLE) to automate student tracking. The teacher's smartphone broadcasts unique BLE identifiers, which the students' Android app detects in real time and automatically mark themselves present in the Firebase backend.

NUST Policies Copilot

LLMs Semester Project

A strictly grounded RAG assistant for NUST University handbooks. Get instant answers about Attendance, Grading, Fees, and Hostels with zero hallucinations. Built with Gemini and LangChain. Offers strict mode, hybrid retrieval, and staleness control.
